DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ruth, Jr. et al. (6,084,471).

Regarding claim 1, Ruth, Jr. et al. (Fig. 2) disclose a variable gain amplifier comprising: a voltage-current converter (201); a current amplifier (202) can be read as current share circuit; and a current-voltage converter (203) having the functions thereof.

Regarding claim 2, wherein the voltage-current converter (201) comprises voltage-current converters (210, 212), which can be a first resistor and second resistor, respectively.

Allowable Subject Matter

Claims 3-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3 calls for, among others, a schematic of the voltage-current converter having the connections thereof.

Claim 4 calls for, among others, a schematic of the current share circuit having the connections thereof.

Claims 5-8 call for, among others, a schematic of the current-voltage converter having the connections thereof.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Hyakutake (5,146,180); Betti et al. (5,418,494); Kimura (5,883,539)) disclose variable gain amplifier having voltage-current, current-voltage converter.
